

the activated secondary mobile station.

3. (Twice Amended) Method according to Claim 1, wherein the messages are generated on the basis of the notification of calendar events.

4. (Twice Amended) Method according to Claim 2, wherein the activation is conducted from the secondary mobile station to be activated.

5. (Twice Amended) Method according to Claim 2, further comprising the steps of:

using a data computing device of the recipient for informing of a received message to the recipient and to acknowledge the received message by the recipient, and

first directing the received message to the data computing device and, if the message is not acknowledged by a determined time, forwarding the message to the activated mobile station.

6. (Amended) System for the transmission of messages from a sender to a recipient, who has a primary mobile station comprising at least means for receiving calls and means for receiving messages, and at least one secondary mobile station comprising at least means for receiving messages, wherein the improvement comprises:

means for activating a secondary mobile station of the recipient to receive messages addressed to the primary mobile station, and

means for directing messages addressed to the primary mobile station to the activated secondary mobile station irrespective of calls to and from the primary mobile station.

7. (Amended) System according to Claim 6, wherein the messages are generated on the basis of the notification of calendar events.

8. (Twice Amended) System according to Claim 6, further comprising:

a data computing device, which comprises means for receiving a message and means for informing of the receipt of the received message,

means for first directing the received message to the data computing device,

means for measuring time and producing an indication if the means for informing of the receipt of the received message does not inform by a determined time,

and

means, responsive to the production of said indication by said means for measuring time for forwarding the received message to the activated mobile station of the recipient.

9. System according to Claim 6, wherein the means for activating a secondary mobile station of the recipient as the receiver of messages addressed to the primary mobile station comprises means for conducting the activation from the secondary mobile station to be activated.

REMARKS

No claims have been amended or added.

Claims 1 - 9 are in the case.
